

I have cut the cable cord and now exclusively stream. CBC Radio and podcasts allow me to be selective to my interests. I really miss some CBC Newsworld and the National, but streaming on the CBC Player is utterly painful! It stutters, restarts, crashes, and subjects me to 30 seconds of commercials for a one minute news clip. Please put effort into my chosen Canadian content without my having to pay cable costs. I resent that public broadcast airwaves--literally--are bought and sold.
